1 Getting things done easily

1.1 Using the template

Copy the `simple.tex` file of this package in the root directory of your document.

1.2 Inserting an image

```
\singlefigure{testimage.png}{A single figure}{fig:single}
```

The `\singlefigure` command lets you easily insert an image in a document.
You must provide 3 parameters to the command:

Image name Images must be in the `/img/` folder of the

1.3 Inserting two images side-by-side

Nella figura 3 c'è una bomba di immagine,
la 1 invece fa cagare. dasdsad

Figure 1: A single figure

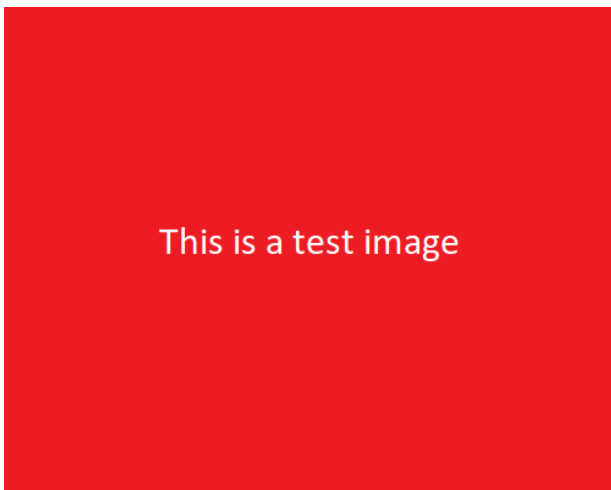

Figure 2: Foo

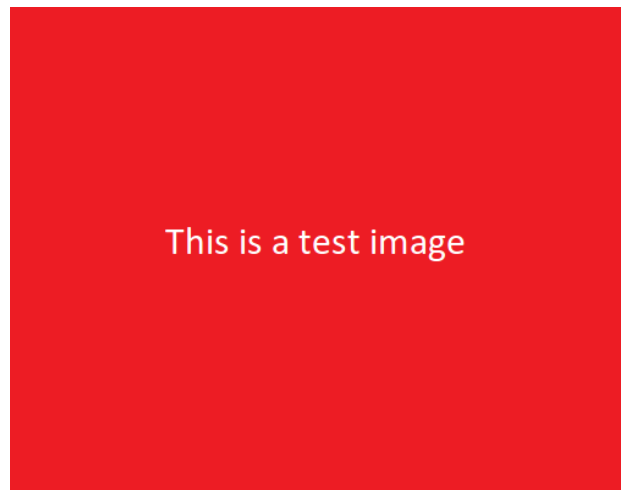

Figure 3: Bar
